IN THE SPECIFICATION

Please replace the following paragraphs:

[0013] Moreover, it is noted that the ~~end~~ side walls 14,16 according to the present invention has an upper surface 22 which is beveled thus providing for visibility into the container 10, which is particularly helpful when the container is used in a retail setting, and when one desires to view the contents stored therein, such as jars and cans having labels. The angle of the end wall upper surface shown herein is approximately 45° , but may of course have any one of various ranges of angles, such as 30°-60°, for providing the desired visibility.
